EXPERIENCE

Halcyon Agile – *Software Development Team Lead*

October 2022 – February 2024

- Work with all the relevant departments to advance research and development to leverage emerging technologies and services.
- Analyze user requirements and convert requirements to a system module/component.
- Monitoring and balancing of the team's workloads.
- Participate in code and design reviews to maintain our high development standards.
- Provide technical assistance and backup to the support teams to resolve issues impacting our systems.
- Prepare required technical documentations.

Halcyon Digital Media Design – *Software Developer*

APRIL 2021 – October 2022

- Understand product requirements and convert them into technical tasks.
- Build data structures and models in both MySQL and NoSQL databases.
- Create a sophisticated application by leveraging AdonisJS for the backend and Next.js for the frontend and ensure a high-quality development.
- Testing and evaluating new programs.

Halcyon Digital Media Design – *Laravel Developer*

APRIL 2017 – July 2021

- Develop responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.
- Implement and maintain a clean and efficient user experience (UX) and user interface (UI).
- Create effective programming solutions and ensure high-quality code standards.
- Maintaining and upgrading existing systems.

Hack & Hustle Digital Inc – *Laravel Developer*

JUNE 2016 – MARCH 2017

- Estimate, build, test and maintain web functions and infrastructure for websites and web apps. The primary technology we use is PHP with Laravel web framework.
- Development of new software according to business requirements.
- Maintenance of deployed applications according to necessary changes.
